

BRAZILIAN SPIRITIST FEDERATION

Mediumship: Study and Practice

Program 1

Module II – The Basis of Mediumistic Communication

# Laboratory of the Invisible World

Topic 4

# Laboratory of the Invisible World

Is the invisible world  
similar to the visible  
or physical plane?

# Laboratory of the Invisible World

In the spiritual realm there are many mansions, all covered with details indicating the evolutionary conditions of their inhabitants.

In the improved regions, we see the elegance and simplicity of its inhabitants, the care they have with certain details, such as objects and decoration of environments, reflecting architectural beauty of the buildings and the splendor of nature.

# Laboratory of the Invisible World

“(...) They obviously did not take these objects with them, since such objects remain behind with us. So where do they obtain the clothing they wear in that other world?”

KARDEC, Allan. *The Mediums' Book*. Pt.2, chap. VIII, it. 126.

# Laboratory of the Invisible World

“(...) spirit exerts a power over the material elements scattered throughout the space of your atmosphere, a power that you are far from having any inkling about. A spirit can concentrate these elements by using its will and give them the appearance that matches its intentions.”

KARDEC, Allan. *The Mediums' Book*. Pt.2, chap. VIII, it. 128, n. 4.

# Laboratory of the Invisible World

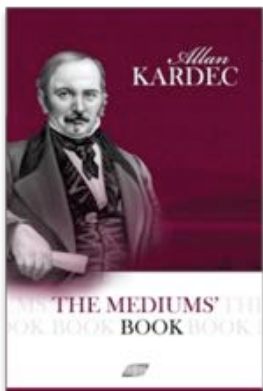

The will exercises, therefore, critical role in the production of all mediumistic and psychic phenomena, including the transmission of spiritual magnetic fluids through passes, a common activity of the spiritist center.

# Laboratory of the Invisible World

”We know of the capital role played by the will in all magnetic phenomena. But how to explain the material action of so subtle agent?”

(...) The will is an essential attribute of the Spirit, that is, the thinking being. With the aid of this lever, it acts on the basic matter and by a consecutive action, reacts upon its components, thus enabling the transformation of its intimate properties.”
