Mediumship: Study and Practice

Program 2

Module II – Mechanisms of Mediumship

Unusual mediumistic manifestations of physical effects

TOPIC 7

of Physical Effects

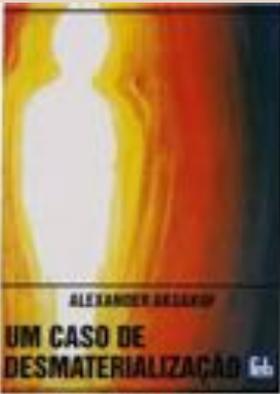

**INSTRUMENTAL
TRANSCOMMUNICATION**

Healing mediumship

Apports and Transports

Materialization of Spirits

Materialization of Spirits

It is a mediumistic phenomenon that allows spirits to become visible and even tangible to people in general, even if they are not seeing mediums.

The main purpose is the proof of survival, individuality and immortality of the Spirit after the death of the physical body.

It involves the use and movement of different fluids, especially ectoplasm provided by the medium of physical effects.

We recommend reading the book *A case of dematerialization* by Alexander Aksakof.

Apports and Transports

This is a rare mediumship

The mediumistic phenomena of transport of objects may be produced both by enlightened spirits and less evolved ones.

The occurrence of this phenomenon can be summarized in three steps:

the Spirit withdraws from nature an object that has no owner.

the dematerialization of this object occurs during the transport.

the materialization of the object occurs in a specific location.

Healing Mediumship

Healing mediumship appears as a manifestation of divine mercy to relieve or cure illnesses, according to the reincarnation purposes of each individual.

"Healing happens by replacing an unhealthy molecule for a healthy one. The healing power is therefore in proportion to the purity of the inoculated substance, but also depends on the energy of the will [of the healing medium]."

The magnetic-spiritual donation that occurs during the pass, usual in spiritist centers, may become a vehicle of healing for diseases or to alleviate the suffering of the sick.

It can be done directly or remotely through the plasma effects (ideoplasties) of thought and will.

KARDEC, A. *Genesis*.

Instrumental Transcommunication

It is a manifestation of the spirits that utilize to communicate, apparatus and equipments located on the physical plane.

The medium is used as a donor of ectoplasmic fluids.

We recommended to read the following books:

The transcommunication through time,

by Hernani Guimarães de Andrade, FE Publisher

Bridge between here and the hereafter
theory and practice of transcommunication
by Hildegar Scafer
